Milestone 4 - Team Paradise

Introduction: Our database will have a rather simple functionality, which ultimately leads to a simple design. It will contain solely user information. The parameters we are recording in our database includes ID, username, password, and highscore.

Database Software: Postgres

Database Visual Representation

Our database is not relational - It only includes one table. The following table shows a visual depiction of what it will look like:

ID (Serial)	Username (Varchar)	Password (Varchar)	HighScore (Int)
1	addodge	password	999999999999999
2	Thejohnsterr	abc123	.000000000000001
...	...	...	...
